

About Construction EPA Company

The Construction EPA Company is a registered End Point Assessment Organisation (EPAO) delivering end-point assessments across a diverse range of construction apprenticeship standards.

Construction EPA Company is looking for Architectural Technology professionals to assist with the development of the end-point assessment for the Level 4 Construction Design and Build Technician apprenticeship standard.

About the Role

Reporting to the Assessment Development Manager and/or Head of End-point Assessment you will contribute to the development of assessment materials. The role is responsible for ensuring assessment materials developed can lead to valid assessment and meeting regulatory requirements assuring Construction EPA Company's continued compliance with the relevant Ofqual and External Quality Assurance (EQA) conditions. This may be through:

- reviewing guidance;
- providing sector specific input;
- writing or reviewing questions (multiple choice, scenario based, short answer);
- writing or reviewing sample/ mock assessment documents, and/or;
- suggesting appropriate resources to support providers and apprentices for assessment.

This is a consultant role with a flexible ad hoc working pattern, involving remote engagement with colleagues at Construction EPA Company in the UK.

Duties are remunerated in line with Construction EPA Company's fee structure for Qualifications Development work.

Candidate Profile

Construction EPA Company is particularly interested in receiving applications from individuals able to demonstrate 3+ years of the essential experience required in: **Construction Design and Build Professional Services**.

Ideally with a teaching and/or assessment qualification, essential experience includes:

- sector experience;
- knowledge and understanding of the apprenticeship standards in particular end-point assessment for the Construction Design and Build Technician standard;
- excellent organisational and planning skills;
- demonstrate strong communication and listening skills;
- flexibility and able to work independently, and;
- the ability to work effectively and confidently with a range of colleagues, prioritising work and meeting deadlines.

Application Process

For further details about the role, interested candidates should submit their latest CV to Jasmin Lewis, Head of End-point Assessment: jasminlewis@constructionepa.com
